Coped Staircase System

Side View

Prior to manufacturing your staircase system we need three measurements in inches:

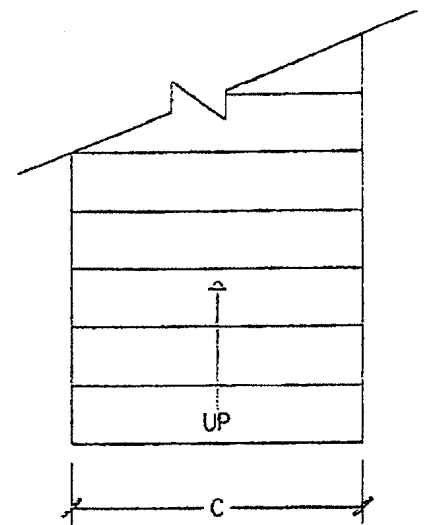

- A. Finished floor to finished floor = _____
- B. Total distance of run = _____
- C. Maximum width of staircase = _____

If the rise is greater than the run, you will have to order a timber staircase. Also, when the rise is greater than the run, the staircase will not meet code.

Do you want your staircase:

Kiln Dried Yes No

Plumb cut & Level cut Yes No

Top View

NOTE: Because the two staircase systems are built to your specifications there are no refunds or returns.
